

HDS-MC

Hydraulic Multi-Cylinder Press

Developed in collaboration with one a European conveyor belt manufacturers, Almex's HDS-MC Series is the most advanced design available for conveyor belt manufacturing. With multiple down stroking cylinders it provides even pressure distribution over the complete surface. Low operating costs and fast cycle times increase belt production and reduce product cost.

FEATURES:

- Multiple Cylinders eliminates the need for a bolster
- Uniform pressure even with different belt widths.
- Lifetime press frame warranty.

SPECIFICATIONS:

- The HD-MC is offered in widths up to 3.2 M in width and 17 M length. Pressures of 500 psi (3.4 Mpa) are possible and 50mm belt.
- Configured in both double or single daylight. Complete turnkey lines with stretchers, clamps and wind-up and let-offs.
- Options include Steel Cable or Fabric conveyor belt production. Hot oil or steam heated platens.

SPECIAL ORDER

Fill out our **Questionnaire** and contact your sales rep to see which press model suits your needs and how we can customize it for you.
