

Ai HEADSET

REMOTE SUPPORT FOR YOUR ON-SITE OPERATORS

Almex SME Remote Support for On-Site Staff

Almex Intelligence (Ai) is the next wave artificial intelligence for remote support to Subject Matter Experts (SMEs). Almex experienced staff collectively provide over 750 years of experience. Connect with those SMEs for:

- Training Support (Classroom to Field support)
- Equipment Installation Instruction with Remote Visual Assistance
- Trouble-shooting and Problem
- Solving-Maintenance and Monitoring

The Ai headset that connects you to the Almex SMEs is an industrial-quality, lightweight Android™ tablet-functionality headset that snaps into most safety helmets, or can worn alone, and doesn't impede safety glasses or corrective eyewear.

The Ai headset provides voice command control of audio, video, file display and applications for hands-free operation. This enables the operator working onsite to have hands-free access to remote subject matter experts, application diagrams and data, instructional video, remote mentor video calling, document navigation, guided workflow, mobile forms and industrial IoT data visualization.

The high-resolution micro display fits just below your line of sight and views like a 7" tablet providing real-time audio and shared viewing of what the operator is seeing to remote staff members or subject matter experts. The Ai headset can be used in wet, dusty, hot, dangerous and loud industrial environments safely.

The Ai Headset comes with a 3-year warranty, has an SD Card slot for additional storage and works with Microsoft Teams over WIFI. Cell data accessibility is available as an option.

INCLUDES:

- Preinstalled Swappable Battery (3250 mAh Li-Ion) lasts 8 hours when fully charged
- Wall Charger
- USB-C Cable
- USB-C to Micro USB adapter
- Overhead Strap and rear pad
