

# MOR FABRIC BELT SPLICE KIT

Fusion Systems provides all the vulcanizing splice materials needed for your **MOR (Moderately Oil-Resistant)** Conveyor Belt splice.

Fusion Systems experts have formulated these splice material compounds specifically for splicing, which means better adhesion and a better-quality, longer lasting splice. Fusion Splice Materials have been proven to work well with leading quality belt manufactures' belts for over a decade.

Buying a custom splice kit provides the following benefits:

- Price is comparable if not lower than most competitors,
- No wasted splice materials,
- No additional handling or transportation required when shipped to your shop or work site,
- No need to store and maintain splicing material inventory,
- No need to monitor splice material expiry.
- Shelf Life of the MOR Fabric Belt Splice Kit is 6 months without refrigeration (20 °C or 70 °F).

*Note: Actual contents will depend on your belt specifications and splice requirements. You may or may not require Belt Noodles, Edge Strips, etc.*

**SPECIAL ORDER** SPECIAL ORDER ITEMS MAY EXPERIENCE DELAYED DELIVERY TIME.

Kits are customized-to-order specifically to your conveyor belt specification and splice requirements.

The Fabric Belt Splice Kit is carefully packed and shipped directly to your work site, ready-for-use, with the details marked on the crate exterior.

Please fill out this **Fabric Conveyor Belt Splice Kit Questionnaire** and our experts will customize your splice kit accordingly.
