

# TCE SOLVENT

**TCE Solvent** is an industrial solvent, cleaner and degreaser ideal for preparing the belt surface for Cold bonding, especially with SA 2000+. Fusion Systems TCE solvent is used for general surface preparation of conveyor belt cold (chemical) splices, metal and rubber used in pulley lagging and linings.

## FEATURES:

- Specially formulated for the rubber fabrication and conveyor splicing industry
- Cleans bare metal i.e pulleys before a lagging change
- Wipe a bonding layer to open up the adhesion crevices for a better bond
- Very pure solvent
- Non-Flammable

### Product Information Properties:

Colour: Clear

Solids (wt.): 0%

Calculated Coverage: 16.6 M<sup>2</sup> (288 ft<sup>2</sup>)

Flash Point: 90°C / 194 °F (Closed cup)

Storage: Store in a cool, dry, well ventilated area away from heat, direct sunlight, hot metal surfaces and all sources of ignition.

PRODUCT CODE	WEIGHT (METRIC/IMPERIAL)
CH-RCT-Q	1.35 kg / 3.0 Lbs.
CH-RCT-G	3.6 kg / 15.0 Lbs.
CH-RCT-5G	33.75 kg / 74 Lbs.
