

# SILICONE TREATED RELEASE PAPER

Fusion **Silicone Treated Release Paper** is a calendered Kraft-type paper with a special silicone non-stick coating. It is designed to be used as a release material between the uncured rubber and vulcanizing press. It can be used in step splicing, finger splicing and steel cord splicing for all types of belts.

## FEATURES:

- Enhances working life of belt splices
- Improves rubber flow during the curing of conveyor belt splices
- Eliminates splice surfaces sticking to the press (normal application) with double-sided silicone coating
- For Natural Rubber (NR), Polyisoprene (IR), Styrene-Butadiene (SBR), Polybutadiene (BR), Polychloroprene i.e. -Neoprene (CR) rubber belt splices

### Product Information Properties:

Paper Type: #70 Kraft

Color: Brown

Release: Silicone Treatment (both sides)

Temperature QC: will darken showing areas of temperature spikes
