

FINGER SPLICE TEMPLATE

Fusion Systems can create a finger splice stencil customized to your splice specifications. The template is cut by a laser on a flexible plasticized material that holds up to paint, moisture and dirt. A template can be created for any size belt and splice. Simply lay the template in place according to the direction of travel and edges of the belt and use spray paint or a rubber marking pen to mark the fingers. Then simply cut the fingers and know they will interlace for your splice as needed.

FEATURES:

- Simplifies the process of calculating and laying out the lines for a finger splice
- Saves time on splicing
- Stencil for finger splice is cut by a laser
- Provide belt width, bias and finger specifications on order
- Re-usable
- Rolls up for ease of transportation

PRODUCT CODE

FST – {B/S- Bias or Straight} - {PIW} - {Belt Width}

Example: a 800 PIW belt, 42" wide with a bias splice would be: FST-B-800-42
