

FABRIC REPAIR STRIPS

Fusion Fabric Repair Strips are ideal for the repair of puncture or gouge damage and longitudinal rips to the conveyor belt cover. The fabric reinforcement in the strip provides durability and longer-term hold security over standard repair strips. One strip per order.

FEATURES:

- Won't damage the conveyor belt
- Allows the belt to be back in service in a matter of hours
- Good wearability and longevity
- All strips feature a bonding layer which offers unrivalled adhesion to the conveyor belt
- Repair strips are available in various widths
