

AMS-3000

DUST CONTROL FOR COAL, LIMESTONE & QUARRY APPLICATION

AMS-3000 mixes easily with water through dosing pump injection creating the solution treatment spray. The application lowers required moisture by up to 70% while providing highly effective dust control results.

■ FEATURES:

- A water-based specially modified surfactant for coal and limestone dust control applications
- AMS-3000 mixes easily with water through mixes easily with water spray system through doing injection that is applied Inline by nozzles and manifolds at the first transfer point in the conveyor system, stabilizing the material through several transfer points prior to final discharge point.
- AMS-3000 is excellent for containment dust control applications for unloading hoppers, dump pockets and crusher loading points.
- Application lowers required moisture by up to 70% while providing highly effective dust control results.
- Controls dust with less moisture while recapturing material particles embedding them back into the material flow.
- Excellent for Intermittent Activation Spray Systems as chemical flows well on demand.
- The best technique for quickly and easily suppressing dust with low application cost is sprays activated only upon loading cycles.

Votech Dust Suppression Solutions work well, are competitively priced and save water use and labor time onsite.
